Young Leaders Program

Overview

The Young Leaders program is a *Process and Project Based Learning* program which engages the participants with outcome based learning by strengthening their thinking and communication skills through meticulously planned activities and projects. The process is driven by rigour and relevance that promotes real world application and genuine thinking and motivate the participants to ask questions, seek answers, find solutions and develop innovative alternatives.

The program treads the participants on a self paced journey from '*whats*' of learning to '*hows*' of action. The program works on each participant as an individual, keeping the larger group dynamics intact. Personalized attention to harness the capacity of each participant along with constructive feedback is the backbone of the learning process.

By the end of the program, the child will be above or at par with peers of their respective age level, in the communication and thinking capacities. The integrated learning approach ensures that the child develops a multi-perspective understanding of the world and uses it in day to day life in effective and efficient ways.

Approach

- The program engages children to participate actively.
- Process of imagining, creating, discussing, debating and collaborating with others happens on different tasks levels.
- Incorporation of hands-on activities, projects and personalized feedback in each session.
- Project-Based learning: Each student will create a set of projects in every course, allowing them to apply skills and knowledge gained.
- Opportunities for children to collaborate with each other and develop multiple skills.
- Focus on thinking rationally, making logical connections, synthesizing information and drawing conclusions to develop critical thinking.
- Developing a strong portfolio through activities done in sessions at each Level.
